THE BOOM IN BIO ACROSS THE GLOBE

DESIGNING, BUILDING AND FINANCING RESEARCH SPACE FOR
GROWING BIO COMPANIES AND BIO CLUSTERS

Before the 2022 BIO International Conference begins in San Diego, join AURP for focused discussion on building research space supporting communities of bio innovations. Biotechnology intermediary organizations, developers, A/E firms, tech transfer officers, researchers, economic development representatives, VC firms, space firms and bio innovation district managers will want to attend.

Practical measurement of local biotech R&D activity is important for both bio ecosystems and businesses that invest in them. By combining government and private data in unique ways, developers, bio companies, and investors can better understand the impact of local R&D life science economies that aren't captured by more conventional rankings. This session will examine the strong anchoring effect that universities and bio tech parks have on start-up formation, governmental and venture investment, workforce assets, and commercialization of new therapies and medical devices.
